

## Crew-Comm MK3 Features Technical Specification

### Overview

The control unit, with integral speaker and microphone, is easily mounted on the vehicle dashboard close to the driver, with an adjustable mount. Simple to operate, the control unit features two separate volume controls, as well as an additional driver's voice override.

In normal operation, Crew Comm MK3 defaults to the vehicle cab unit so that the driver can hear what is happening at the rear of the vehicle at all times. The highly effective two-way communications system operates from 12V or 24V supplies.

The polycarbonate enclosed remote speaker and microphone unit, can be mounted in any convenient position at the rear of the vehicle, such as, adjacent to the vehicle equipment control centre.

#### Crew Comm MK3 benefits include:-

- Low cost
- Highly beneficial safety feature
- Aids productivity, providing more efficient team communications
- Simple to use, push button control
- Completely uninhibited by background noise or interference

When Crew Comm MK3 communications system is used in conjunction with a mobile CCTV system it provides an all round solution for any vehicle where increased efficiency and safety awareness is paramount.

#### The Crew Comm MK3 system comprises of:

- Cab Unit with two way speaker control
- Rear Mounted Crew communication unit
- Cables, fixings
- Operates on 12V-24V power supply
