

VT IDent

Vehicle security

VT IDent

VT IDent is a security system that provides independent control of the vehicles.

It uses programmable tags or keypads to the vehicle controls.
Using RFID - radio frequency identification.

VT IDent can prevent theft or injury caused by the untrained and unauthorised use of dangerous on-board equipment and prevent unauthorised people from driving the vehicle, significantly reducing the risk of accidents.

FEATURES :

- Complete controlled access
- Prevent accidents
- Fuel savings as a vehicle engine is not constantly running
- Up to **60 month warranty** available
- All tags are a passive design they do not contain batteries, therefore, do not have a limited lifespan
- Passive RFID technology – Operator must present their tag
- Improves operational efficiency.
