

VT Illuminated Turnsign

Cycle safety

VT Illuminated Turnsign

Improve awareness, help detect vulnerable road users and reduce the risk of accidents when turning left or right. Our range is perfect to gain your star rating for Direct Vision Standard compliance.

Warn cyclists of your presence with our illuminated sign.

VT Illuminated Turnsign specifically improves vehicle visibility for approaching vulnerable road users, warning them away from the hazardous left-side of the vehicle. With 3 different illumination patterns, we have an option to suit.

FEATURES :

- **Reduces Incidents** : Be more visible on the road to prevent turning accidents
- **Get Attention** : Increase awareness of your vehicle using high intensity warning flashes or constant illumination at eye level
- **Accreditation** : Suitable for FORS and CLOCS accreditation and Direct Vision Standard
- **Robust** : Tough and durable. 150mm x 22mm size allows it to be fitted to all types of vehicles.
